+91 7078311859

Dehradun, India

Summary

Full Stack developer building production-ready web applications and automation systems.

I design *clean, maintainable code (frontend + backend), develop custom Discord bots, and deliver fast, mobile-first websites.*

Recent work includes a deployed Discord bot (Numexa), a responsive restaurant platform (Delight Restaurant), and a conversion-focused personal portfolio.

I focus on performance optimization, secure deployments, and clear documentation for clients.

Education

PCM

The Horizon Schhol • Dehradun, Uttarakhand

05/2026

Skills

Full Stack Development, Discord Bot Development, Responsive Web Design, Performance Optimization, Custom Websites

Experience

Self-Employed

Freelance Full Stack Developer • Remote

08/2025 - Present

- Deliver end-to-end web and automation projects: requirements, architecture, implementation, deployment, and documentation.
- Build responsive, mobile-first frontends and robust backends (Node.js / Express, MySQL).
- Design and implement Discord bots with modular command architecture, automation, and persistent storage.
- Provide deployment support on Netlify / Vercel and handover documentation for clients.
- Notable deliverables: Numexa (Discord bot), Delight Restaurant website, and personal portfolio.

Independent Project

Full Stack Developer – Delight Restaurant (Business Platform) • Remote

02/2026 - 02/2026

- Designed and developed a multi-page, responsive restaurant platform with interactive menu and reservation/contact flow.
- Implemented mobile-first UI and optimized assets for faster page loads and improved UX on small screens.
- Deployed and configured hosting; delivered documentation for updates and client edits.

Independent Project

Founder & Full Stack Developer – Numexa (Discord Bot) • Dehradun, Uttarakhand

01/2026 - 02/2026

- Solely designed, implemented and deployed a modular Discord automation bot with slash & prefix command support.
- Implemented moderation, role management, and persistent storage for leaderboards/economy features.
- Built a demo/documentation landing page and published it for client demos.
- Focused on low-latency event handling and maintainable code that is easy to extend.
